STEEL SINK / HAND CRAFTED / QUARTZ

SEZON

STAINLESS STEEL KITCHEN SINK

Transforming Spaces With Eclectic, Exclusive Designs

Sezon, the name commensurate with high performing premium designer kitchen sinks that merge into kitchen of any size and décor.

Crafted with creativity and produced with technical expertise, these modular kitchen sinks meet and beat the changing customer needs and wants, since last 17 years. With focus on the every minute detail, these sinks and related accessories are manufactured at our state of the art infrastructure located at morbi. Our experienced designers, engineers and craftsmen believe in creating out of the world experiences with these products. The sinks are crafted to pinpoint accuracy on 1mm,0.8mm with grade of 304 and 1mm with grade of 204 thick stainless steel of premium quality. The fully automated indian polishing machine ensures that the sinks have best shine and sparkle with plain border.

Quality control systems are managed through iso 9001:2015, ensuring that the best products adorn your kitchens.

Delivering the value of beauty, style, décor, hygiene and convenience of use, these sinks make the home owner proud and the guests amazed.

In the last 17 years of operations, we have established a high reputation for our brand. Sezon branded accessories and sinks have a good customer recall. Our principles for this market position are competitive pricing, nationwide dealer and distributor network and excellent after sales support apart from the key quality aspects of our products.

Successful participation in vibrant ceramic expo and summit and other trade fairs have established us as a premium brand in india. The future as we see is our hand made sinks making a mark on indian home décor scene.

SINK REFERENCE GUIDE

Hand Crafted Sink

Made in India

India is a born leader, and like many of the countries leader have believed, India is destined to play an extremely important role in leading the world in the right direction. Sezon products are proudly made in india and according to the India user and requirement.

1mm & 0.8 mm Thickness

Sezon uses 1mm & 0.8mm thick steel for most of its series. This makes the sinks less vulnerable to denting and bending even after years of receiving knocks from utensils.

2mm frame

2mm frame is used in sink. The embodiment of thicker frame gives more strength and solid look. We assure a durable sink and a great look.

R-10 Radias

Fresh, geometric design offers straight sidewalls and a flat bottom for a modern look and more usable space inside the sink. Items sit flat in the bottom of the sink, and glassware is less likely to tip over and break tight 10mm corners are easy to clean.

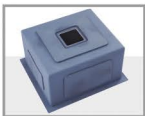

Zero Radius corner

Perfectly squared 90° corners give the sink a modern look with a flat bottom and straight side walls for more usable space inside the sink.

Smart Drain

This square shaped drain with its unique design helps in hassle free waste disposal. It keeps your drain clog free. Easy to clean and use it is a hygienic alternate to regular drain.

Undercoat with sound suppression pad

Sezon use special grade sound-suppression pads and undercoating. The main advantages of this special feature are that it absorbs sound, protects against condensation build-up inside kitchen cabinets and helps to maintain sink water temperature.

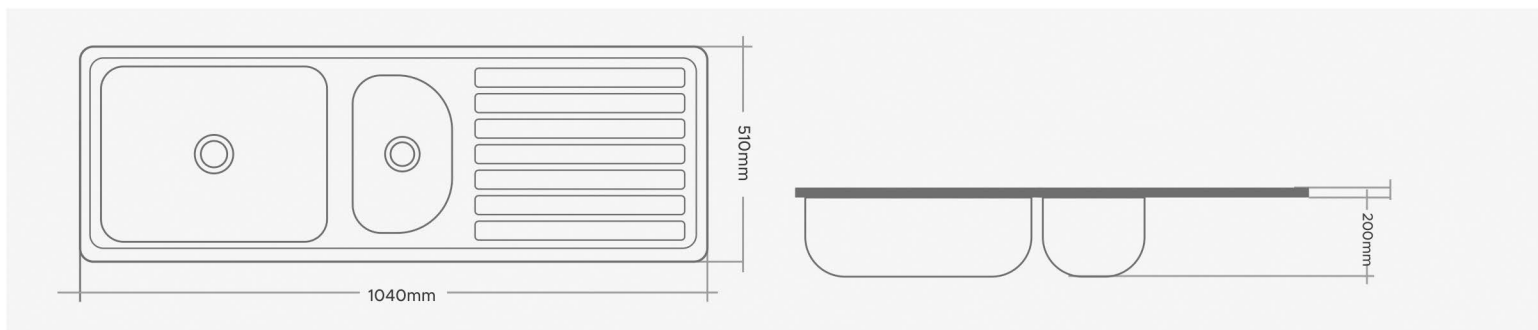

STEEL KITCHEN SINK

Innovative Sinks,
Timeless Charm

steel sink

Elevate your daily rituals with our exquisite stainless sink collection, where functionality meets artistry. Discover sinks that transform your space into a sanctuary of elegance and refinement.

Installation Of

The Sink Preparing A New Countertop

1 Trace the sink outline on the countertop (do not cut along this line).

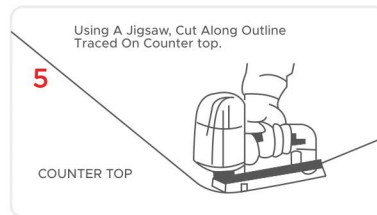

2 Draw a line 1 cm inside the sink outline.

3 Measure the cut-out line you just drew and compare to all dimensions (double check).

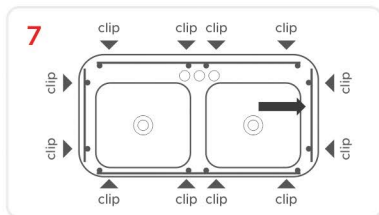

4 Using a 2 hole saw, Drill a pilot hole inside the cutting line.

5 Using a Jigsaw, cut along the inside line to cut the opening in the countertop.

6 With sink in the upside down position place a continuous and generous bead of silicone sealant around the entire perimeter of the rim. This serves as a watertight seal.

7 Lift sink, turn face up and lower into the countertop cutout opening Wipe excess sealant from perimeter with a wet cloth.

8 DRILLING TAP HOLE Invert the Sink. Use the marking to Drill the Hole with Wood Cutting Bit.
